

# Motorhomes 2024

## Technical Information

valid from January 12th, 2024

# Dethleffs Plus Factors –

## Explanation of symbols

In the Dethleffs motorhomes you will find a lot of intelligent ideas and standard comfort equipment. Here you can see the most important symbols which you will find on the respective vehicle pages. More detailed information and explanations can also be found on [www.dethleffs.com/plus-factors](http://www.dethleffs.com/plus-factors)

### Family benefits

Family-friendly: At least 4 sleeping berths without seating lounge conversion

Flexible: A comfortable pull-down bed offers additional sleeping berths, if wanted.

### Added safety

Safe on the road: Premium broad gauge low platform for secure and dynamic driving experience

### Added comfort

Inviting: 70 cm XXL entrance door

“SleepWell”: Fixed beds with 7-zone mattresses and ergonomic wooden bed frames.

Put your feet up: Comfortable L-shaped lounge with free-standing table

Freedom of movement: Separate shower and the washing area can be connected to a big bathroom

Easy entrance: Thanks to lowered Coupé entrance step

### Added longevity

Long-lasting: Rot-proof body construction without wood inserts and with GRP covered underfloor, roof and rear (rear depending on layout)

Long-lasting: Rot-proof floor construction without wood inserts and with GRP covered underfloor (roof and rear depending on layout)

Durable: Proven reliable floor and body construction with GRP-covered sidewall, roof and rear, and excellent insulation

### Added equipment

Winter specialist! Excellent winter resistance due to elaborate double floor construction in combination with standard hot water heating system

Winterproof: Heated double floor with frost-protected water installation and additional storage space

Rear Wheel Drive of base chassis

For a healthy indoor climate: Optimal rear ventilation of overhead lockers avoids condensation

King of storage: Particularly high rear garages thanks to Dethleffs drop chassis extension

Height-adjustable queens bed: Comfortable entrance to bed or high garage

More power: 95 Ah battery with AGM technology for higher performance, longer life and shorter charging time

More power: 150 Ah battery with AGM technology for higher performance, longer life and shorter recharge time

System Control Unit: Your digital control center! Call up important vehicle data and control relevant consumers such as the refrigerator, heating and air conditioning via a touch display in the living area or via the mobile app

# IMPORTANT INFORMATION FOR THE SELECTION OF YOUR MOTORHOMES

When buying a motorhome, camper van or urban vehicle (hereafter: motorhome), it is particularly important to choose the right layout and an appealing design. In addition, weight also plays an essential role. Family, friends, optional equipment, accessories and baggage – space must be available for all of these. At the same time, there are legal and technical limits to the configuration and load. Every motorhome is designed for a certain weight, which may not be exceeded during driving. For motorhome buyers, this raises the question: How should I configure my vehicle to accommodate passengers, baggage and accessories according to my needs without the vehicle exceeding this maximum weight? In order to make this decision easier for you, we provide you below with a few tips that are particularly important when selecting your vehicle from our portfolio:

## 1. The technically permissible maximum laden mass...

... is a value set by the manufacturer which the vehicle may not exceed. Dethleffs specifies a layout-related upper limit for the vehicle, which can vary from layout to layout (e.g. 3,500 kg, 4,400 kg). You can find the corresponding specification for each layout in the technical data.

### Low Profile model overview

		Model 1	Model 2
Standard chassis		Fiat Ducato	Fiat Ducato
Emission standards		Euro 6d Final	Euro 6d Final
Overall length, approx.	cm	599	695
Overall width, approx.	cm	220	220
Overall height, approx.	cm	281	281
technically permissible maximum laden mass	kg	3499	3499
Mass in running order	kg	2.890 (2.746 - 3.035)*	2.982 (2.833 - 3.131)*
Permitted number of seats (including driver)		4	4
Manufacturer-specified mass for optional equipment	kg	245	149

## 2. The mass in running order...

... consists – to put it simply – of the basic vehicle with standard equipment plus a standard weight of 75 kg for the driver. It is legally permissible and possible for the mass in running order of your vehicle to deviate from the nominal value stated in the sales documents. The permissible tolerance is  $\pm 5\%$ . The permissible range in kilograms is given in brackets after the mass in running order. In order to provide you with full transparency regarding possible weight deviations, Dethleffs weighs each vehicle at the end of the line and informs your trade partner of your vehicle's weighing result for forwarding to you. Detailed explanations on the subject of mass in running order can be found in the "Legal Information" section.

### 3. The permitted number of seats (including driver)...

...is determined by the manufacturer in what is referred to as the type-approval procedure. This results in what is referred to as the mass of the passengers. For this, a standard weight of 75 kg per passenger (without driver) is calculated. Detailed explanations on the subject of mass of the passengers can be found in the "Legal Information" section

### Low Profile model overview

		Model 1	Model 2
Standard chassis		Fiat Ducato	Fiat Ducato
Emission standards		Euro 6d Final	Euro 6d Final
Overall length, approx.	cm	599	695
Overall width, approx.	cm	220	220
Overall height, approx.	cm	281	281
technically permissible maximum laden mass	kg	3499	3499
Mass in running order	kg	2.890 (2.746 - 3.035)*	2.982 (2.833 - 3.131)*
● Permitted number of seats (including driver)		4	4
● Manufacturer-specified mass for optional equipment	kg	245	149

### 4. The manufacturer-specified mass for optional equipment...

... is a value set by Dethleffs per layout for the maximum mass of optional equipment that can be ordered. This limit is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. If, in exceptional cases, the weighing at the end of the line nevertheless shows that the actual load capacity falls short of the minimum pay-mass due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. Detailed explanations on the subject of the effects of the tolerances on the minimum pay-mass and the payload can be found in the "Legal Information" section.

### Optional extra

		Price €	Additional weight	Code	Model 1	Model 2
<b>Bathroom</b>						
Shower grid	—	359,-	9	1385	—	○
Additional window in bathroom	—	269,-	5	9845	○	○
<b>Multimedia</b>						
Automatic HD satellite system 65 Twin	—	549,-	15	713	○	—
Dethleffs Naviceiver incl. DAB+, truck navigation and connection to on-board control panel		238,-	1.5	1657	○	●

### 5. The additional weight of optional equipment and packages...

... increases the actual mass of the vehicle (= mass in running order plus selected optional equipment) and reduces the pay-mass. The specified value shows the additional weight compared to the standard equipment of the respective layout. The total weight of the selected packages and optional equipment must not exceed the manufacturer-specified mass for optional equipment."

○ Optional equipment   — Not possible   ● Standard equipment   ◆ Mandatory   △ Not known at the time of publication

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is

weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

# Standard equipment

<b>Fiat chassis</b>	
Fiat Ducato Light low platform (3,499 kg), Multijet 140 (2.2 l / 103 kW / 140 hp), 6-speed manual transmission	●
Right-hand drive chassis	●
Steel rims 15" (215/70 R15C) incl. full wheel covers	●
<b>Fiat chassis features</b>	
ABS (anti-lock braking system) / EBD (electronic brakeforce distribution)	●
Additional protection for radiator through grille at front of vehicle	●
Anti-theft device	●
Automatic Brake Assist after a collision	●
Captain seats: integrated headrests, two armrests, swivel function	●
Chassis in right-hand drive version	●
Crosswind Assist	●
Cruise control	●
Cup holder in the centre of the dashboard	●
Diesel tank 75 litre incl. 19L AdBlue tank	●
Driver and passenger airbags	●
Driver and passenger detection	●
Driver's cab manual A/C	●
ESP incl. ASR, Traction Plus, Hill Holder and Hill Descent Control	●
Front-wheel drive	●
Height and tilt adjustable incl. two padded armrests for the driver and front passenger seat	●
Low-vibration coach-style exterior mirrors that can be heated and adjusted electrically (two-piece)	●
Pleated blinds in the windscreen and side windows of the driver's cab for the best insulation and privacy	●
Rear axle mudflaps	●
Trailer Stability Assist	●
Tyre inflation kit and towing eye	●
<b>Exterior features</b>	
70 cm wide habitation door	●
Bedroom window right and left	●
Dethleffs Exclusive rear light carrier with 3rd brake light	●
Driver's cab door left	●
EPS insulation	●
Floor thickness: 49 mm, side wall thickness: 34mm and roof thickness: 35 mm	●
Flyscreen habitation door	●
GRP roof	●
Habitation access with comfortable, wide, electric step	●
Habitation door with window incl. blackout and central locking (incl. cab door)	●
Large rear garage: two garage doors/flaps with turn/tighten lock, rear lowering (150 kg surface load), anti-slip surface, heated, lashing strips, illuminated, 1x 230 V socket	●
Lifetime construction technology: Tried-and-tested reliable flooring and superstructure with excellent insulation	●
Panoramic skylight 40x40 cm with flyscreen and blackout blinds above the pull-down bed	●
Panoramic skylight 75x105 cm above the seating lounge	●
Side panels and rear panel made of resistant high-gloss GRP with smooth, shiny surface	●
<b>Exterior design</b>	
Exterior body painted in white	●
<b>Interior design</b>	
Upholstery Floyd	●
Wood décor Noce Nagano	●
<b>Textile equipment</b>	
Carpet, loose	●
Fixed beds with ergonomic wooden slatted frames and 150 mm thick 7-zone premium mattresses made of climate-regulating material	●
<b>Furniture layouts</b>	

# Standard equipment

Cosy L-shaped lounge with free-standing, rigid table base and two integrated 3-point seatbelts	●
Floor-to-ceiling wooden sliding door to the bedroom	●
Full body mirror	●
High-level single beds incl. comfortable access via steps	●
Manual pull-down bed in the driver's cab	●
Option to convert single beds to double bed	●
Overhead locker doors with soft-close function	●
Wardrobe floor-to-ceiling with convenient linen drawers in upper area	●
<b>Kitchen</b>	
Floor-to-ceiling fridge with separate freezer compartment and automatic energy selection (AES) (137 l)	●
Gourmet kitchen: two-ring hob, large drawers, cutlery tray, bin and generous worktop	●
MultiFlex rail system incl. hooks (further accessories via Dethleffs Original Accessories)	●
Oven in the kitchen floor units	●
<b>Bathroom</b>	
Equipped with cabinets, storage compartments, large mirrors, toothbrush mug and toilet paper holder	●
Shower grid	●
<b>Multimedia</b>	
DAB+ radio antenna mounted on the roof	●
Flat-screen TV bracket	●
Pre-wiring for satellite system	●
Preparation for radio system incl. sound package in the driver's cabin	●
<b>Heating</b>	
Gas hot-air heating 6kW with 1.8kW electric heating element and hot-water boiler incl. digital control panel	●
<b>Electrical installation</b>	
Automatic switch-on/disconnect for starter battery, leisure battery and refrigerator	●
Awning light 12 V	●
Awning light switched off when ignition on	●
Electric block with integrated overvoltage protection and separate ground fault circuit breaker	●
Indirect ambient lighting above the overhead lockers	●
LED lighting throughout the vehicle	●
Leisure battery AGM, 95 Ah	●
Luxus on-board control panel	●
Number of sockets 1x 12V, 6x 230V, 2x USB	●
Pre-wiring for solar	●
Spotlights in the roof lining above the habitation door	●
<b>Water supply</b>	
Fresh water tank in insulated and heated area	●
Insulated waste water tank	●
Submersible pump	●
<b>Gas supply</b>	
Storage space for 2 gas bottles with a filling weight of 11 kg each	●
<b>Safety</b>	
Smoke detector	●

# PACKAGES GLOBEBUS A CLASS

\* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for

optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

# Globebus Go Low Profile

The next adventure is just a bend in the road away! The new Globebus Go is so compact and manoeuvrable that even narrow roads and low passages cannot stop it. This enables completely new travel and leisure experiences. On the other hand, it is amazingly spacious inside: with plenty of room to move around and storage space, a smart swivel bathroom and generous bed dimensions. By the way: if desired, the Globebus Go can also be upgraded to a real winter specialist!

## Technical info

Overall length, approx.	599 - 669 cm
Overall width, approx.	220 cm
Overall height, approx.	269 cm
Headroom in living area, approx.	190 cm

Maximum values partly not possible for all models or only in connection with certain options.

\* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for

optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

WI-KO Winter Comfort Package

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and

explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

# Just Camp Low Profile

Some decisions are easy. For example, the new Just Camp! With its chic new design, good equipment and many fresh ideas, it makes it easy to get started in caravanning. Six different layout solutions also contribute to this, covering the most diverse wishes and requirements for the type of mobile life. The new Just Camp is available on the basis of the Citroen Jumper.

## Technical info

Overall length, approx.	696 - 741 cm
Overall width, approx.	233 cm
Overall height, approx.	294 cm
Headroom in living area, approx.	213 cm

Maximum values partly not possible for all models or only in connection with certain options.

## Upholstery

+ Upholstery Drake

## Wood décor

+ Wood décor Noce Nagano

## Plus factors

- + Proven Lifetime body construction with GRP outer skin and excellent insulation
- + 70 cm wide habitation door with central locking
- + Interior height 2.13 m (not below pull-down bed)
- + Pleasant sleeping comfort due to 150 mm thick 7-zone cold foam mattresses made of climate-regulating material and ergonomic wooden slatted frames

\* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is

weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

\* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for

optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and

explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

# Just Go Low Profile

Experience the world of motorhomes simply and easily - the new Just Go, based on the Ford Transit, does it perfectly.

Comprehensive equipment as well as modern interior with feel-good character, it already has everything on board as standard - and at a real friendship price. Want more? The Comfort Package supplements the standard equipment with lots of added value: more safety, more comfort, more fun. Just do it!

## Technical info

Overall length, approx.	669 - 736 cm
Overall width, approx.	233 cm
Overall height, approx.	299 cm
Headroom in living area, approx.	213 cm

Maximum values partly not possible for all models or only in connection with certain options.

## Upholstery

+ Upholstery Salerno incl. driver and front passenger seat cover

+ Upholstery Calypso incl. driver and passenger seat cover  
○

## Wood décor

+ Wood décor Noce Nagano

○ optionally available

## Plus factors

- + Proven Dethleffs quality at an attractive, friendly price
- + 70 cm wide habitation door
- + Interior height 2.13 m (not below pull-down bed)
- + Pleasant sleeping comfort thanks to 7-zone cold foam mattresses made of climate-regulating material and ergonomic wooden slatted frames
- + Optional pull-down bed
- + Fully equipped kitchen with 2-burner hob and Multiflex rail system
- + 137 l fridge with large freezer compartment

\* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is

weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for

optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and

explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

## WI-KO Winter Comfort Package

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and

explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

# Trend Low Profile

The bestseller in the Dethleffs model programme has been completely revised: Modern design, extensive standard equipment and practical new functions make the Trend the undisputed price/performance winner. A special comfort feature is the stepless IsoProtect living area floor, which extends from the driver's cabin to the bathroom. As a Low Profile model, the Trend has an opening window in the driver's cab bonnet as standard, for an airy, light-flooded interior.

## Technical info

Overall length, approx.	699 - 741 cm
Overall width, approx.	233 cm
Overall height, approx.	300 cm
Headroom in living area, approx.	205 cm

Maximum values partly not possible for all models or only in connection with certain options.

## Upholstery

+ Upholstery Saros

+ Heron partial faux leather upholstery

○

+ Upholstery Yoko

○

## Wood décor

+ Wood décor Ashton

○ optionally available

## Plus factors

- + Lifetime Smart superstructure - with wood-free, GRP-clad underbody
- + Aerodynamic T-hood with pop-up window as standard
- + Exclusive rear design with top-entry rear wall, ShapeLine LED tail lights and 3rd brake light integrated into the rear spoiler
- + Large rear garage can be loaded on both sides, one-hand operation of the garage doors, lighting, 230 V socket and sturdy lashing rails
- + 70 cm wide habitation door with convenient coupe entrance
- + Level Iso-Protect comfort flooring in the living area without landings or steps
- + New overhead locker concept with handleless fronts and large storage volume incl. AirPlus overhead locker rear ventilation
- + Sleeping area: Outstanding sleeping comfort with 150 mm thick Evopore cold foam mattresses

\* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is

weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for

optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and

explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

# Trend A Class

The bestseller in the Dethleffs model programme has been completely revised: Modern design, extensive standard equipment and practical new functions make the Trend the undisputed price/performance winner. A special comfort feature is the stepless IsoProtect living area floor, which extends from the driver's cab to the bathroom. With the large pull-down bed in the driver's cab, there are always two additional, comfortable sleeping berths on board the Trend Integrated as standard, which do not take up any space during the day.

## Technical info

Overall length, approx.	699 - 740 cm
Overall width, approx.	233 cm
Overall height, approx.	300 cm
Headroom in living area, approx.	205 cm

Maximum values partly not possible for all models or only in connection with certain options.

## Upholstery

+ Upholstery Saros

+ Heron partial faux leather upholstery

○

+ Upholstery Yoko

○

## Wood décor

+ Wood décor Ashton

○ optionally available

## Plus factors

- + Lifetime Smart superstructure - with wood-free, GRP-clad underbody
- + Exclusive rear design with top-entry rear wall, ShapeLine LED tail lights and 3rd brake light integrated into the rear spoiler
- + Large rear garage can be loaded on both sides, one-hand operation of the garage doors, lighting, 230 V socket and sturdy lashing rails
- + 70 cm wide habitation door with convenient coupe entrance
- + Level Iso-Protect comfort flooring in the living area without landings or steps
- + New overhead locker concept with handleless fronts and large storage volume incl. AirPlus overhead locker rear ventilation
- + Pull-down bed in the cab as standard
- + Sleeping area: Outstanding sleeping comfort with 150 mm thick Evopore cold foam mattresses

\* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is

weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

\* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for

optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

Package	Chassis Package (13848)	GT Package (13850)
Dashboard with aluminium application	x	x
Driver's cab automatic A/C	x	x
Electric parking brake	x	x
Diesel tank 90 litre incl. 19L AdBlue tank	x	x
Steering wheel with control elements	x	x

# Esprit A Class

The Esprit combines modern design in Nordic style with excellent upper-class comfort. Its heated double floor with frost-proof water installation makes it a winterproof all-year-round companion. 26 cm high, it offers usable, additional storage space.

## Technical info

Overall length, approx.	781 cm
Overall width, approx.	233 cm
Overall height, approx.	298 cm
Headroom in living area, approx.	205 cm

Maximum values partly not possible for all models or only in connection with certain options.

## Upholstery

+ Upholstery Kari

+ Real leather individual

+ Rubino real leather upholstery

+ Upholstery Nubia

## Wood décor

+ Wood décor Noce Nagano

optionally available

## Plus factors

- + 180 hp (136 kW) Multijet engine, 9-speed torque converter automatic transmission, automatic climate control, multifunction leather steering wheel and much more.
- + Ideal driving characteristics: Premium low-frame chassis with 145 mm lowering and up to 4.5 t gross vehicle weight
- + Absolute winter resistance due to heated raised floor with installation laid frost-protected
- + Lifetime Plus superstructure technology with absolutely rot-proof and durable wall construction
- + Spacious rear garage, with doors on both sides, 250 kg surface load, anti-slip floor covering, fleece lining, lashing rails, lighting as well as one-hand operation and 2-point locking system
- + Gourmet kitchen with 3-burner stove, generous drawers with soft-close retraction and central locking, cutting board, apothecary pull-out, and much more.
- + Large, comfortable pull-down bed with 200 x 150 cm lying surface, high-quality cold foam mattress and wooden slatted frame. Electrically operated

○ Optional equipment — Not possible ● Standard equipment ◆ Mandatory △ Not known at the time of publication

\* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is

weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for

optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and

explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

\* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is

weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

○ Optional equipment — Not possible ● Standard equipment ◆ Mandatory △ Not known at the time of publication

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is

weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for

optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and

explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

# Globetrotter XL A Class

This lifestyle luxury motorhome combines spacious living, modern design and genuine driving dynamics. The sporty design language translates a premium wide-track low-platform chassis into real driving experiences. With the Globetrotter XLI, you are just as good on the road as it looks: sporty, dynamic and safe - and thanks to the winterproof double floor construction, 365 days a year.

## Technical info

Overall length, approx.	861 cm
Overall width, approx.	233 cm
Overall height, approx.	304 cm
Headroom in living area, approx.	208 cm

Maximum values partly not possible for all models or only in connection with certain options.

## Upholstery

+ Upholstery Samir

+ Real leather individual

+ Real leather upholstery Colin

+ Upholstery Melia

## Wood décor

+ Wood décor Amberes Oak

optionally available

## Plus factors

- + 180 hp (136 kW) Multijet engine, 9-speed torque converter automatic transmission, automatic climate control, multifunction leather steering wheel and much more.
- + Ideal driving characteristics: Premium low-frame chassis with 220 mm lowering and up to 5.4 t gross vehicle mass
- + Absolute winter resistance due to heated raised floor with frost-protected installation.
- + Hot water heating as standard. Comfortable warmth even at the frostiest temperatures. Ideal for allergy sufferers, as no dust whirling up.
- + Lifetime Plus superstructure technology with absolutely rot-proof and durable wall construction
- + Gourmet kitchen with mineral countertop, 3-burner high-efficiency stove, generous drawers with soft-close retraction and central locking, apothecary pull-out, and more.
- + Spacious bathroom with sliding door to the bedroom

\* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for

optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and explanations on the subject of weight can be found in the Legal information section.

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the pay-mass. The additional weight indicated for packages and optional equipment shows the additional weight compared to the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the manufacturer-specified mass for optional equipment shown in the model overviews. This is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. Detailed information and

explanations on the subject of weight can be found in the Legal information section. An increase of load capacity increases the manufacturer-specified mass for optional equipment. The increase results from the higher pay-mass due to the alternative chassis. The increased tare weight of the alternative chassis and, in particular, the weight for any mandatory heavier engine variants (e.g. 180 hp) must be deducted from this. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

# Globetrotter XXL Coachbuilt

The big luxury! With its robust Iveco Daily chassis with rear-wheel drive, the Globetrotter XXL A is the workhorse in the Dethleffs model range. Ideal for towing trailers weighing up to 3.5 tonnes. Perfectly equipped, with plenty of space and absolutely winterproof thanks to frost-proof installation in the double floor!

## Technical info

Overall length, approx.	886 cm
Overall width, approx.	235 cm
Overall height, approx.	345 cm
Headroom in living area, approx.	211 cm

Maximum values partly not possible for all models or only in connection with certain options.

## Upholstery

+ Upholstery Samir

+ Real leather individual

+ Real leather upholstery Colin

+ Upholstery Melia

## Wood décor

+ Wood décor Amberes Oak

optionally available

## Plus factors

- + Powerful 3.0 l JTD engine with 210 hp (154 kW), automatic transmission, rear-wheel drive, dual tires, air suspension drive axle, full LED low and high beams
- + Absolute winter resistance due to heated raised floor with frost-protected installation.
- + Hot water heating as standard. Comfortable warmth even at the frostiest temperatures. Ideal for allergy sufferers, as no dust whirling up.
- + Professional self-sufficiency due to 150 Ah battery and 230 l fresh water tank
- + Lifetime Plus superstructure technology with absolutely rot-proof and durable wall construction
- + Gourmet kitchen with mineral countertop, 3-burner high-efficiency stove, generous drawers with soft-close retraction and central locking, apothecary pull-out, and more.
- + Spacious bathroom with sliding door to the bedroom

\* INFO

The specified mass in running order is a default value defined in the type-approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5 % of the mass in running order are legally permissible and possible. The permissible range in kilograms is given in brackets after the mass in running order. The manufacturer-specified mass for optional equipment is a calculated value for each type and layout that Dethleffs uses to determine the maximum weight available for factory-fitted optional equipment. The limitation of optional equipment is intended to ensure that the minimum pay-mass, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the vehicle load capacity of the vehicles delivered by Dethleffs. The real weight of your vehicle ex works can only be determined when it is

weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls below the minimum pay-mass despite limiting the optional equipment due to a permissible weight deviation, we will check together with your trade partner and you whether we should, for example, increase the load capacity of the vehicle, reduce the number of seats or remove optional equipment before delivering the vehicle. The technically permissible maximum laden mass of the vehicle and the technically permissible maximum mass on the axle must not be exceeded. Detailed information & explanations on the subject of weight and the configuration of the vehicle can be found in the section Legal information. For a more detailed description of all mandatory technical dependencies, please refer to the explanations on the footnotes.

# Standard equipment

Iveco chassis	
16" steel rim with 225/75 R16 M+S	●
IVECO Daily ladder frame (6,700 kg) 3.0 I JTD (154 kW / 210 hp), torque converter automatic transmission	●
Right-hand drive chassis	●
Iveco chassis features	
Adaptive Cruise Control incl. Active Lane Keeping Assist and Active Brake Assist with City Emergency Braking function	●
Air suspension for driving axle (original Iveco)	●
Alternator 220 Ah	●
Anti-theft device	●
Breakdown kit	●
Central dash tray (A4 format) with 2 x USB and aux-in	●
Chassis in right-hand drive version	●
Crosswind Assist	●
Cruise control	●
Daytime running lights integrated into headlights	●
Differential lock for driving axle	●
Driver and passenger airbags	●
Drivers cab A/C (automatic)	●
ESP, ASR, ABS with EBD, Hill Holder and Hydraulic Brake Assist	●
Electric handbrake	●
Exterior mirrors that can be heated and adjusted electrically	●
Fog lights with static cornering lights	●
Fuel tank 90l plus 20l AdBlue	●
High Beam Assist	●
Hill Descent Control	●
LED headlights (Iveco)	●
Luxury front seats with heated seats, two padded armrests, 3-way adjustable, hydraulic, luxury headrests with Dethleffs logo	●
Multifunctional leather steering wheel	●
Rain sensor incl. driving light assistant	●
Rear corner steadies supports (2 pcs.) for rear mounting	●
Rear wheel drive with twin tyres	●
Safety Package II: 2 x 3-point seatbelt for seat facing away from driving direction	●
Spare wheel located under the vehicle rear	●
Tyre pressure sensors	●
Exterior features	
70 cm wide habitation door with window and blind	●
Bedroom window right and left	●
Central locking for the drive's cab, habitation and garage door	●
Double floor storage, some of which can be loaded across almost the entire vehicle width	●
Double-glazed flush-fitting windows with blackout & mosquito net (Privacy Black)	●
Electric closing aid for habitation door	●
Floor thickness: 43 mm, side wall thickness: 44mm and roof thickness: 45 mm	●
Flyscreen habitation door	●
GRP roof	●
Habitation access with comfortable coupe entrance	●
Habitation access with comfortable, wide, electric step	●
High characteristic Dethleffs Exclusive rear light carrier with ShapeLine LED taillights and 3rd brake light integrated in rear spoiler	●
Lifetime Plus construction technology: rot-free superstructure with no wood inserts, XPS insulation with GRP cladding on the underslung and roof	●
Opening window in overcab left	●
Opening window in overcab right	●
Panoramic skylight 75x105 cm in the lounge	●
Rear garage: two garage door with one-hand operation, rear lowering (250 kg), heated, lashing rails, LED lights across the entire width, 230 V socket, GRP anti-slip flooring and fleece cove	●

# TECHNICAL INFORMATION / FOOTNOTES

If you order your vehicle with additional equipment, you should check whether it makes sense or is necessary to increase the vehicle's weight! The optional equipment partially replaces the standard equipment.

## FOOTNOTES

- 1) Please note that the total height may increase due to additional roof structures and optional equipment..
- 2) 9-speed torque converter automatic transmission incl. 16" steel wheels
- 3) "Trailer hitch" and "Ford 6-speed automatic transmission" not possible together.
- 4) "Chassis Package Advance" and "Dethleffs Naviceiver" not possible together.
- 5) Only possible in combination with option 11506 "Flat screen 22" HD TV"
- 6) Only possible in combination with the option "flat screen bracket" (code 325).
- 7) Only possible in combination with option 11258 "Automatic HD SAT system 65 Twin"
- 8) Not possible in combination with option 761 "Hot water heating"
- 9) The standard 25 A charge booster is replaced by a 45 A charge booster.
- 10) An optional seat must be considered as a regular seat when calculating the minimum payload and the mass of the passengers. In order to obtain an optional seat, it must be ensured that the minimum payload is still maintained and that all other legal mass values are complied with. Please contact our trade partners for detailed information.
- 11) Only possible in combination with the option "Seat group with belt bench incl. two 3-point belts" (Code 1951).
- 12) Replaces the standard Ford audio system radio.
- 13) Not possible in combination with the option "Assistance package Ford" (Code 13248), replaces the standard Ford audio system radio.
- 14) The "panoramic roof bonnet 70x50 cm in the living area" in combination with the option "electric pull-down bed above the seating group" (Code 680) is in the sleeping area.
- 15) The "70x50 cm panoramic skylight in the living area" is replaced by a "40x40 cm panoramic skylight" in combination with the "electric drop-down bed above the seating group" option (code 13738).
- 16) Only possible in combination with option 761 "warm water heating"
- 17) Please note that the image from the optional rear view camera is displayed on a separate screen.
- 18) Only possible in combination with option 7505 "captain's chair with air suspension from SKA"
- 19) Only possible in combination with option "genuine leather upholstery"
- 20) Your local trade partner will be happy to help you design and define the "Individual genuine leather".
- 21) Not possible in combination with the option "Macerator ceramic toilet with waste-holding tank" (Code 1625).
- 22) Only possible in conjunction with the option "Preparation for radio system incl. sound package in the driver's cab" (Code 659).
- 23) Only possible in combination with option 1809 "Additional flat screen holder"
- 24) Only possible in combination with the option "Dethleffs Naviceiver " (Code 9582).
- 25) Please note that the image from the optional reversing camera is displayed on a digital interior rear view mirror.
- 26) Only possible in combination with the option "Bed construction seating group transverse" (code 1944).
- 27) Please note that with the option "Extra seat incl. side couch instead of sideboard" (code 435) the flat screen holder or the optional 32" flat screen (code 9807) is mounted on the entrance module.
- 28) Only possible in conjunction with the option "Additional seat incl. side couch" (code 435).

# IMPORTANT INFORMATION REGARDING THE SELECTION OF YOUR MOTORHOME

The weight specifications and tests for **motorhomes** are uniformly regulated throughout the EU in EU Implementing Regulation No. 2021/535 (until June 2022: EU Implementing Regulation No. 1230/2012). We have summarised and explained the key terms and legal requirements from this **regulation** for you below. Our **dealers** and the Dethleffs configurator on our website offer you additional assistance in configuring your vehicle.

## 1. Technically permissible maximum laden mass

The **technically permissible maximum laden mass** of the vehicle (e.g. 3,500 kg) is a mass specification set by the manufacturer which the vehicle must not exceed. Information on the **technically permissible maximum laden mass** of the model you have chosen can be found in the technical data. If the vehicle exceeds the **technically permissible maximum laden mass** in everyday driving, this constitutes an administrative offence which may result in a fine.

## 2. Mass in running order

In simple terms, the **mass in running order** is the basic vehicle with **standard equipment** plus a legally fixed standard weight of 75 kg for the driver. This essentially includes the following items:

- the unladen weight of the vehicle together with the bodywork, including operating fluids such as greases, oils and coolants;
- the **standard equipment**, i.e. all equipment items that are included as standard in the factory-fitted scope of delivery;
- the fresh water tank filled to 100 % in driving mode (driving fill according to manufacturer's specifications;) and an aluminium gas cylinder filled to 100 %;
- the **fuel tank**, which is 90 % full, including fuel;
- the driver, whose weight – regardless of the actual weight – is generally specified as 75 kg in accordance with EU law.

Information on the **mass in running order** can be found for each model in our sales documents. It is important to note that the value for **mass in running order** given in the sales documents is a default value determined in the **type-approval procedure** and verified by the authorities. It is legally permissible and possible for the **mass in running order** of the vehicle delivered to you to deviate from the nominal value stated in the sales documents. The legally permissible **tolerance** is  $\pm 5\%$ . In this way, the EU legislator accounts for the fact that certain fluctuations in the **mass in running order** occur due to variations in the weight of supplied parts as well as due to processes and weather conditions.

These weight deviations can be illustrated by means of an example calculation:

- **Mass in running order** acc. to sales documents: 2,850 kg
- Legally permissible **tolerance** of  $\pm 5\%$ : 142.50 kg
- Legally permissible range of **mass in running order**: 2,707.50 kg to 2,992.50 kg

The specific range of permissible weight deviations can be found for each model in the technical data. Dethleffs makes great efforts to reduce weight variations to the minimum that is unavoidable for production reasons. **Deviations** at the upper and lower end of the range are therefore very rare; however, they cannot be completely ruled out technically, even

with all optimisations. The real weight of the vehicle and compliance with the permissible **tolerance** is therefore checked by Dethleffs by weighing each vehicle at the **end of the line**.

## 3. Mass of the passengers

The **mass of the passengers** is set a standard value of 75 kg for each seat provided by the manufacturer, regardless of the actual weight of the passengers. The **mass of the driver** is already included in the **mass in running order** (see no. 2 above) and is therefore not included again. In the case of a **motorhome** with four **permitted seats**, the **mass of the passengers** is therefore  $3 * 75 \text{ kg} = 225 \text{ kg}$ .

## 4. Optional equipment and actual mass of the vehicle

**Optional equipment** (also: additional equipment) includes, according to the legal definition, all optional equipment parts not included in the **standard equipment** which are fitted to the vehicle under the responsibility of the manufacturer – i.e. ex works – and can be ordered by the customer (e.g. awning, bicycle or motorbike carrier, satellite system, solar system, oven, etc.). Information on the individual or package weights of the **optional equipment** that can be ordered can be found in our sales documents. **Optional equipment** in this sense does not include other **accessories** that are retrofitted by the **dealer** or you personally after the vehicle has been delivered ex works.

The **mass of the vehicle in running order** (see no. 2 above) and the mass of the **optional equipment** fitted to a specific vehicle at the factory are together referred to as the **actual mass**. You will find the corresponding information for your vehicle after handover under item 13.2 of the Certificate of Conformity (CoC). Please note that this specification also represents a standardised value. Since the **mass in running order** – as an element of the **actual mass** – is subject to a legally permissible **tolerance** of  $\pm 5\%$  (see no. 2), the **actual mass** may also deviate accordingly from the stated nominal value.

## 5. Pay-mass and minimum pay-mass

The installation of optional equipment is also subject to technical and legal limits: Only so much optional equipment can be ordered and fitted at the factory that sufficient free weight remains for baggage and other accessories ("pay-mass") without exceeding the technically permissible maximum laden mass. The pay-mass is calculated by subtracting the mass in running order (nominal value according to sales documents, see no. 2 above), mass of the optional equipment and the mass of the passengers (see no. 3 above) from the technically permissible maximum laden mass (see no. 1 above). The EU regulations stipulate a fixed minimum pay-mass for motorhomes, which must remain as a minimum for baggage or other non-factory-fitted accessories. This minimum pay-mass is calculated as follows:

Minimum pay-mass in kg  $\geq 10 * (n + L)$

Where: "n" is the maximum number of passengers plus the driver and "L" is the overall length of the vehicle in metres.

For a motorhome with a length of 6 m and 4 approved seats, the minimum pay-mass is therefore e.g.  $10 \text{ kg} * (4 + 6) = 100 \text{ kg}$ .

To ensure that the **minimum pay-mass** is maintained, there is a maximum combination of **optional equipment** that can be ordered for each vehicle model. In the above example with a **minimum pay-mass** of 100 kg, the total mass of **optional equipment** for a vehicle with four **permitted seats** and a **mass in running order** of 2,850 kg should not exceed 325 kg:

3,500 kg **technically permissible maximum laden mass**  
 - 2,850 kg **mass in running order**  
 - 3\*75 kg **mass of the passengers**  
 - 100 kg **minimum pay-mass**  
 = 325 kg **maximum permissible mass of optional equipment**

It is important to note that this calculation is based on the default value for **mass in running order** as defined in the **type-approval procedure**, without taking into account the permissible weight deviations for **mass in running order** (see no. 2 above). If the maximum permissible value for the **optional equipment** of (in the example) 325 kg is almost or completely exhausted, an upward weight deviation can therefore result in the **minimum pay-mass** of 100 kg being met mathematically using the default value for the **mass in running order**, although in fact there is no corresponding **load capacity**. Here, too, an example calculation for a vehicle with four seats, whose real weighed **mass in running order** is 2 % above the nominal value:

3.500 kg **technically permissible maximum laden mass**  
 - 2.907 kg **real weighed mass in running order** (+ 2 % compared to the stated value of 2,850 kg)  
 - 3\*75 kg **mass of the passengers**  
 - 325 kg **optional equipment** (maximum permissible value)  
 = 43 kg **actual load capacity** (< **minimum pay-mass** of 100 kg)

In order to avoid such a situation, Dethleffs further reduces the maximum permissible weight of the total **optional equipment** that can be ordered on a model-specific basis. The limitation of **optional equipment** is intended to ensure that the **minimum pay-mass**, i.e. the legally prescribed free mass for **baggage** and retrofitted **accessories**, is actually available for the **vehicle load capacity** of the vehicles delivered by Dethleffs. Since the weight of a specific vehicle can only be determined when it is weighed at the **end of the line**, in very rare cases a situation may arise in which the **minimum pay-mass** at the **end of the line** is not guaranteed, despite this limitation of **optional equipment**. In order to guarantee the **minimum pay-mass** even in these cases, Dethleffs will check together with your **trade partner** and you before delivery of the vehicle whether, for example, the vehicle is loaded up, seats are reduced or **optional equipment** is removed.

## 6. Effects of tolerances of the mass in running order on the pay-mass

Regardless of the **minimum pay-mass**, you should note that unavoidable production-related fluctuations in the **mass in running order** – both upwards and downwards – have a mirror-image effect on the remaining **load capacity**: If you order our example vehicle (see no. 3. above), for example, with **optional equipment** with a total weight of 150 kg, the calculated **pay-mass** based on the default value for the **mass in running order** is 275 kg. The **load capacity** actually available may deviate from this value due to **tolerances** and may be higher or lower. If the **mass in running or-**

**der** of your vehicle is, for example, permissibly 2 % higher than stated in the sales documents, the **load capacity** is reduced from 275 kg to 218 kg:

3.500 kg **technically permissible maximum laden mass**  
 2.907 kg **real weighed mass in running order** (+ 2 % compared to the stated value of 2,850 kg)  
 3\*75 kg **mass of the passengers**  
 150 kg **optional equipment** ordered for the specific vehicle  
 = 218 kg **sactical load capacity**

As a precaution to ensure that the calculated **pay-mass** is actually given, you should therefore take the possible and permissible **tolerances** for the **mass in running order** into account when configuring your vehicle. We also recommend that you weigh the laden **motorhome** on a non-automatic scale before each journey and, taking the individual weight of the **passengers** into account, determine whether the **technically permissible maximum laden mass** and the **technically permissible maximum mass on the axle** are observed.

## General Information

The information on the scope of delivery, appearance, performance, dimensions and weights of the vehicles corresponds to the knowledge available at the time of going to press and to the European homologation regulations.

Technical changes in design and equipment as well as errors excepted. These Technical Information is valid from 12 January 2024. Vehicle illustrations in this document may contain optional equipment subject to an extra charge. We expressly reserve the right to make changes. With the publication of this Technical Information, all previous technical documents lose their validity.
